(not-Ranadu) Ways of getting data into R: HTML pages

readHTMLTable(URL, ...)

Example: RTD schedule, route 228 southbound at the RAF hangar:

```r
suppressMessages(require(XML))
Schedule <- readHTMLTable(U, which = 1, skip.rows = 1:5)
names(Schedule) <- c("Stop1", "2", "3", "4", "5", "6", "7",
    "(RAF)", "BPNR1", "BPNR2", "BPNR3", "BPNR4")
head(Schedule[, 8:12], 11)
    (RAF) BPNR1 BPNR2 BPNR3 BPNR4
1    842A    --  852A    --    --
2    915A    --  925A    --    --
3   1018A    --    --    -- 1028A
4   1118A    --    --    -- 1128A
5   1218P    --    --    -- 1228P
6    118P    --    --    --  128P
7    218P    --    --    --  228P
8    317P    --    --    --  327P
9    350P  400P    --    --    --
10   420P    --    --    --  430P
11   450P    --    --    --  500P
```
